S. P. JAIN,
for Registrar General India.

NATIONAL

SAVINGS

CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 22nd April, 1950—Contd.

Corrected Return for w/e 15th April, 1950.														

Corrected Return for w/e 15th April, 1950.

* In case of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

† Figures not available.

REMARKS

The figures of births and deaths shown in this statement for the week ending the 22nd April, 1950 relate to 184 towns with an estimated population of 24,472 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 79% of the total number of towns representing 86% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 12,574 and 10,596 representing birth and death rates of 26.7 and 22.5 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 168 towns with an estimated population of 22,251 thousands. Information about Assam and Bihar could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 84% of the total number of towns representing 90% of the total population is covered. The numbers of births and deaths recorded in these towns were 11,459 and 9,832 representing birth and death rates of 26.8

and 23.0 per thousand of population respectively. The table at the end gives the position by States.

The towns of Malegaon in Bombay, Hardwar Union in Uttar Pradesh and Nabadwip in West Bengal recorded high death rates of 109.1, 59.3 and 66.9 per thousand of population respectively. In Malegaon, the high death rate was largely due to deaths from fevers and smallpox, in Hardwar Union and Nabadwip the high death rate was mainly due to deaths from fevers and cholera.

(B) States (Part B).—The data here relate to 16 towns with an estimated population of 2,221 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 50% of the total number of towns representing 59% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,115 and 764 representing birth and death rates of 25.1 and 17.9 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
